E-Safety at Shirley Infant School

The Importance of E-Safety

As technology advances, the Internet is becoming more accessible and some children now use it more than the adults in their family.

At Shirley Infant School, your child's learning includes the use of carefully chosen web resources and we recognise the need to foster an e-safe culture where children know how to stay safe when using the Internet.

Our E-Safety Vision

Shirley Infant School aims to foster an e-safe culture in which issues of e-safety are discussed openly and honestly. We alert our users of potential risks and we encourage the children to develop their own sets of safe and responsible behaviour through computing sessions, discrete e-safety sessions, circle times and by demonstrating positive behaviour both inside and outside school. We appreciate that e-safety is primarily a safeguarding issue for which all staff are responsible.

What are these characters helping the children to learn about?

- ✓ To know what personal information is.
- ✓ That to stay safe we must not share our personal information with people we cannot or do not trust.
- ✓ Who we can talk to if we need help with a worry.

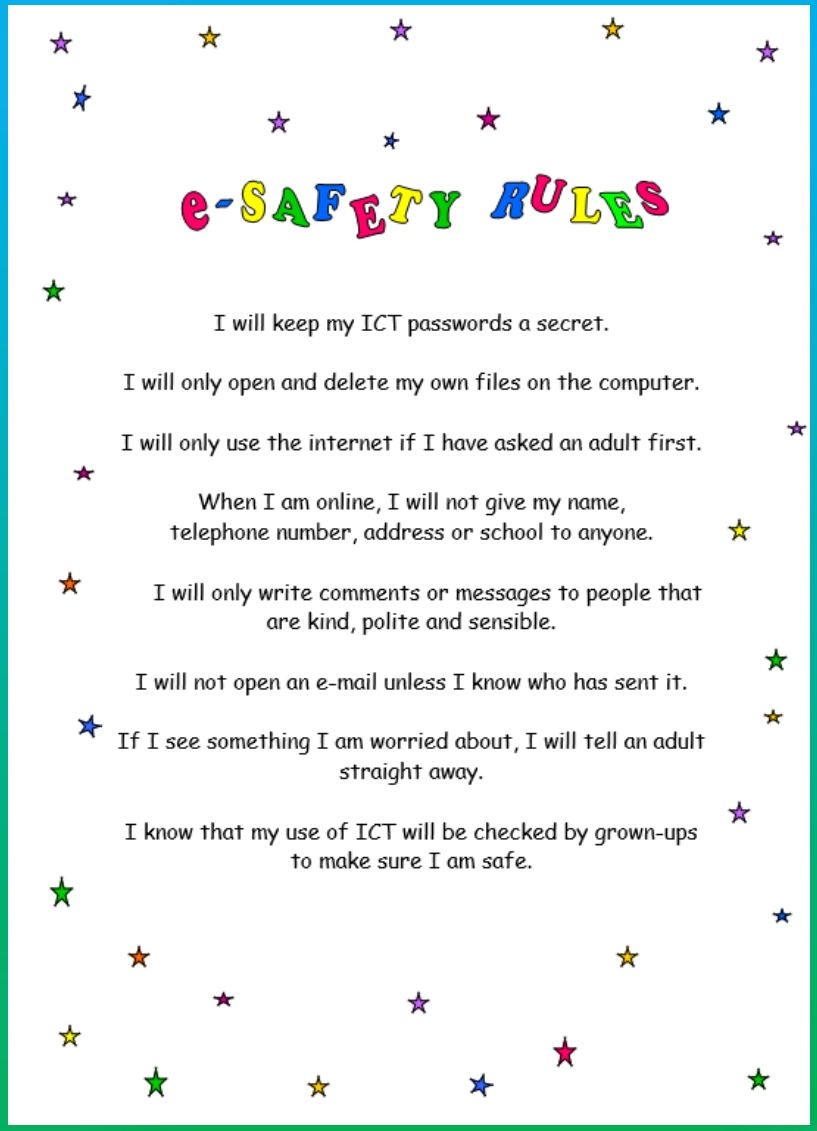
What is personal information?

Personal Information

- Name
- Age/date of birth
- Address
- Telephone number
- School
- Email address
- Passwords
- Photographs

Any piece of information that can identify you.

E-Safety Rules



Help for at Home

On your hand-out there is a section that lists some websites that are dedicated to e-safety.

Keeping your child safe at home is as important as it is at school, whether they are using the Internet on a pc or apps on a tablet.
