

Longstock Farm

Some of Shirley Infants School pupils went on a Geography Trip to Longstock Farm, near Salisbury. Whilst there, the pupils were able to explore the land, characteristics and phenomena of the farm. Additionally, the children were able to compare the physical and human features found on and around the farm. As well as this, it was a very exciting opportunity for them all to see first-hand how food is grown and reared as well as see how farmers manage their land sustainably; in order to encourage wildlife and protect the environment. Similarly, they got to meet all the animals and feed them! It was an enriching experience for the children and it helped to develop their desire and motivation to learn!

Weather Reporters

This half term the children have become Weather Reporters and have really enjoyed using the equipment to look at the weather each day. They have used different equipment to check the weather and then they go back to class to report their findings to the rest of their class. We have looked at how much rain there has fallen, the direction the wind is blowing and also the temperature that day. They have loved being weather reporters and we look forward to seeing some of them being meteorologists when they are older!
