Shadow Play

Whilst we have this glorious weather, get into the garden or by a window and try these ideas.

Place any toy or object at the foot of a page and place in a position so the shadow is cast on the paper. Draw around the shadow and colour in!

Alternatively, at the window, use a piece of paper and a toy in the same way as before but draw around it each hour and see what happens.

Knowledge & Understanding of the world -

Discuss how the shadow appears to move. Is it the sun moving or the Earth? What happens to the Sun in the morning and what happens as it draws close to night time?
