

Dear Parents and Carers,

For the children's Home Learning Project, we would like your child to choose **one** of the animals and then find out lots of facts about this animal. Please help your child to make a very simple poster, fact file or little book with illustrations, captions or sentences, and email this to the school for them to share with the class. Please find out what group they are classified in (mammal, bird, amphibian, reptile or fish), what they eat, their habitat, what they look like and any other interesting facts. You are invited to help as much as you like when supporting your child with this project, however please encourage the children to do their own writing!

			
elephant	snake	tiger	octopus

Have fun researching together! Please email your child's work to the school by Monday 23rd November.

We look forward to reading your facts!

The Year 1 Team
