

What I already know...

I know how to program a simple floor robot to carry out a short sequence of steps.

I know that an algorithm is a set of instructions that have to be precise and accurate

Coding Creators

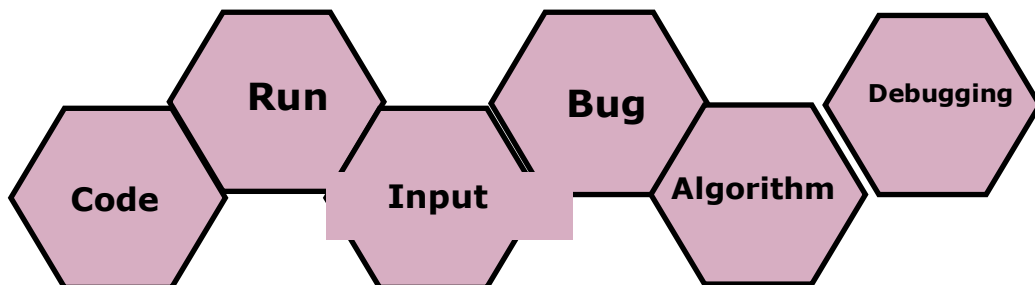

Children will build on their knowledge of algorithms to create and follow codes to make objects move on a computer based program.

I will learn...

- ⇒ To follow simple instructions when creating codes on a computer based program
- ⇒ How to combine commands to make objects move
- ⇒ How to correct a code if the code I have created is not working

Key Vocabulary
