

## What I already know...

Weather changes throughout the year.

Classifying animals into their groups.

How to look carefully at things that are changing.

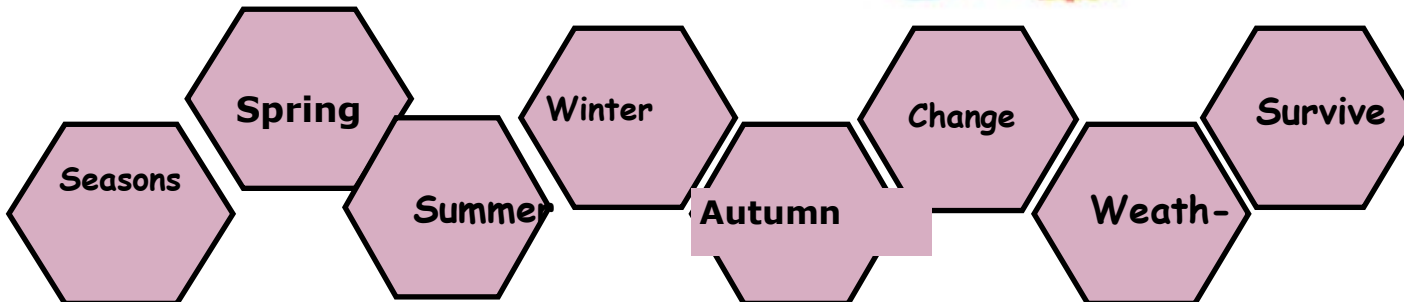

How to count numbers.

# Seasonal Change

Children will name the seasons Autumn, Winter, Spring and Summer. They will describe the changes in trees, clothes and weather between Autumn and Winter. The children will set up and investigate how to measure the rain, temperature and wind over a week and answer questions about their results. We will also find out how different animals survive in the Winter.

## Key Vocabulary

## I will learn...

- How the trees and the clothes we wear change in Autumn and Winter.
- To describe how the day length varies from Autumn to Winter.
- How to collect and record data about the weather in winter.
- How some animals adapt, migrate or hibernate in winter to survive.
