

Year R Spring 2 Term Curriculum Newsletter

4th March 2022

Dear Parents / Guardians,

The first topic for this half term is 'On the Farm'. During this topic we will be finding out what animals live on the farm, what their habitats are and how the farmers look after the. We will be reading lots of farm based books throughout the topic to embed further understanding. We all had a fantastic time with Mill Cottage Farm visiting us and we learned lots about the animals that came to visit, and how the farmers look after each of them! As of Tuesday we have been given the responsibility of some eggs in incubators to look after in our classrooms, and we are all eagerly looking forward to seeing how many of our eggs hatch!

Continuing on the theme of birth and new life, our second topic this half term is 'Easter'. The children will be being very creative and messy, making a few Easter things to share with you.

In Maths we will continue our learning numbers to 10. Looking for patterns in numbers, applying our more and less skills. We will be learning to use a tens grid to represent numbers and thinking about the different ways we represent these.

We are delighted with the progress the children are making with their phonics and reading. We have now covered all the sounds taught in Year R and will continue focusing on fluency of blending and recognising of digraphs within words (e.g. feet or goat). A little each day has a huge impact on their learning. This does not have to be solely through our reading scheme books.

Try looking for words in the environment, making words with magnetic letters and reading simpler words in the story books you share with them. These skills are just as valuable, and more importantly, fun! Please remember that all children learn at different rates and we will support them according to their individual needs. We assess each child's progress daily through our phonic and reading sessions, ensuring they are receiving the correct reading books.

In writing we are continuing to strengthen the children's fine motor control with manipulative activities and are teaching them how to hold their pencils correctly. A good pencil grip is key to a child's development in their writing skills. We will be writing a mixture of label, lists and captions this half term.

We are often asked about what you can do at home to help your children, here are a few suggestions:-

- Please practice the sounds books as it is very important that children know their letter sounds for reading and writing. "I spy" with letter sounds is a great game to help them practise.
- Using magnetic letters on the fridge to make words from their word boxes
- Drawing and hand strengthening activities e.g. Playdough, Lego, cutting and sticking
- Writing words with different materials - paint, water and paintbrush, in shaving foam
- Number, dice and card games - snap, dominoes, snakes and ladders
- Every day maths - shopping (money), cooking (weighing), DIY (measuring)
- Counting on from a number other than 1 to extend their understanding of the number system

Thank you again for your ongoing support.

Yours sincerely,

Ellen Kennedy
