

What I already know...

Life cycles of butterflies., chicks, frogs.

The 5 senses- sight, touch, hearing, smell, taste.

PSHE discussions into how I have changed since I was a baby.

Measuring using cm.

Key Vocabulary

Humans

Children will identify how animals and their babies grow and how humans are mammals. They will name and discuss the different body parts and their uses. The children will discover how humans change as they grow older and investigate differences between themselves and a younger child. The need to eat a balanced diet and the reasons why we need to exercise will also be explored.

I will learn...

- To notice that animals, including humans, have offspring which grow into adults, by describing the changes to animals as they grow.
- To find out about and describe the basic needs of animals, including humans, for survival (water, food and air), by identifying the ways that different animals meet their basic needs.
- To describe the importance for humans of eating the right amounts of different types of food, by exploring food groups.
- To describe the importance for humans of exercise, by finding out why humans need to exercise.
