

What I already know...

Basic parts of the human body

Parts of animal bodies and how to classify them.

How to look carefully at things.

Humans!

The children will learn about their bodies and think about any similarities or differences between ourselves and animals.

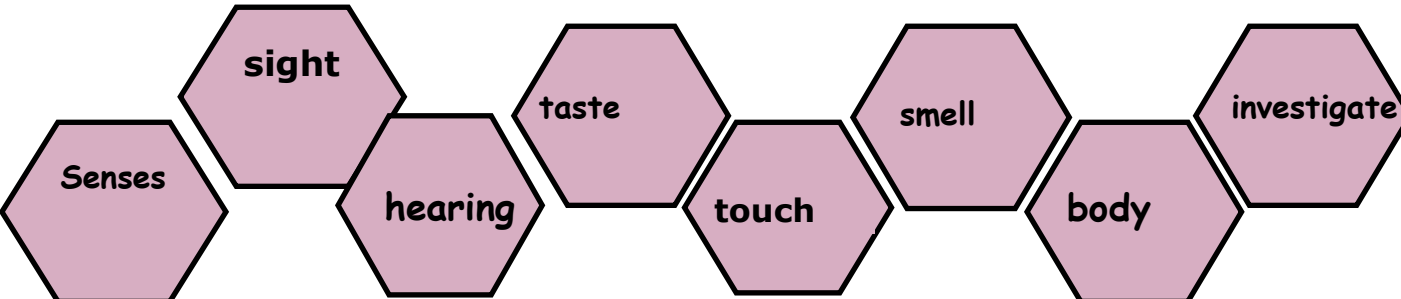

The children will label their body parts and name the 5 senses. The children will use their senses to conduct an investigation.

I will learn...

- To name parts of my body.
- To name the 5 senses and use the correct vocabulary to describe what they do.
- How to use my senses to solve a problem.
