

What I already know...

I know that things grow and change. (TW 40-60)

I know that some objects are similar and some are different (TW 40-60)

I can make observations and talk about why things occur (TW ELG)

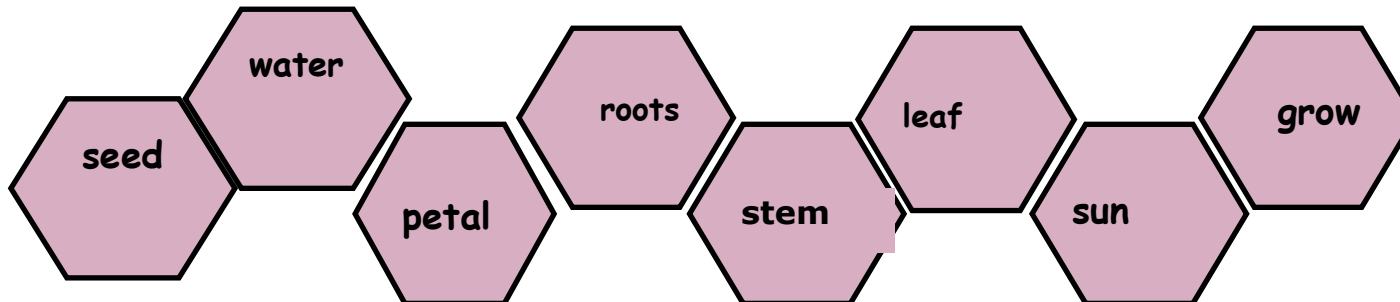

I know that trees and plants need food, air and water to survive after my trip to the Common to find out about SWAF.

Growing!

Children will explore the plants and trees in our local area. They will name and label the parts of the plants and be able to describe what those parts do. The children will measure the trees within our school grounds using non-standard measurement. All children will grow their own 'bean in a bag' and look after it as it grows. They will then be able to plant it into a pot and take it home.

Key Vocabulary

I will learn...

- ⇒ To identify plants and trees within school.
- ⇒ To name and label the parts of a plant and a tree.
- ⇒ What plants need to grow and use this to grow my own bean.
- ⇒ Look carefully and observe differences and similarities between plants and trees.
