Let's have a look at what flowers look like to insects. What did you learn from the video? What is different to how we see the flowers?

https://www.bbc.co.uk/news/science-environment-16983115

Can the children create a flower with a stem, leaves, roots and petals? You could present this flower in any way you want using paint, colouring pencils, playdoh, lego, junk modelling or any other materials you have to hand! Can you then talk through the different parts of the flower and the jobs each part has?

This video helps to explain each part of the plant and the functions it has.

https://www.bbc.co.uk/iplayer/episode/b06yml8y/something-special-were-all-friends-series-10-6growing

Make sure you take lots of photographs and put them in your Home Learning book. We look forward to seeing your amazing work! Have fun!
