<u>Year 2</u>

<u>Mental Maths</u>

- 20 ÷ 2 = 2 x 1 =
- 29 + 46 = 42 20 =
- 15 + 30 = 71 27 =

This week's Maths focus is: Fractions

<u>https://www.bbc.co.uk/bitesize/topics/z3rbg82</u> You might like to watch these lessons on Fractions to support your learning ©

Some useful things to remember:

We can use our division work from last week to help us!

The bottom part of the fraction (denominator) tells us how many parts we need to divide into.

The top part of the fraction (**numerator**) tells us how many of those parts we need to look at.

When you divide, the parts must be <u>equal</u>. If the parts are not equal, go back and check your counting.

1/4 of 16 =	Circle half of the amount below.
One fifth of 20 =	
<u>3</u> of 24 =	Colour in the fractions for each shape below.
Half of 70 =	

Gretel had 20 sweets. She gave two fifths of them to her brother. How many sweets did she have left? sweets

## Challenge:

Read each statement, show your working and then circle your answer.

Which is smaller?	1/3 of 18?
Which is longer?	<sup>3</sup> / <sub>4</sub> of 16m or 2/3 or 21m?
