

Year 2

Mental Maths

$30 \div 10 =$

$5 \times 9 =$

$52 + 18 =$

$58 - 11 =$

$16 + 15 =$

$53 + 19 =$

This week's Maths focus is: **Shape**.

Can you draw a line and match the 2D shapes with their names?

rectangle

triangle

circle

square

Now for 3D shapes...

cuboid

cylinder

cone

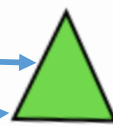

sphere

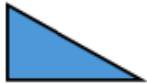

Quick reminder

Side = flat edges on a shape

corner = point bits

Name	Shape	Number of sides	Number of corners
Pentagon			
Rectangle			
Square			
Triangle			
Hexagon			

Match the shapes to the number of sides:

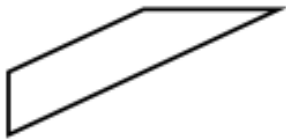

six

four

three

Colour or tick the shapes with 4 corners.

Tricky word alert...

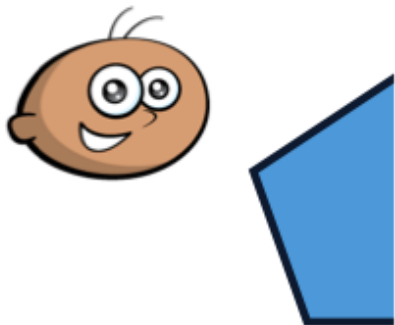

A shape with **SYMMETRY** means you can fold it exactly in half and both sides are the same.

A **vertical** line is one that goes straight down. Like this →

Can you find the vertical lines of symmetry in these shapes?

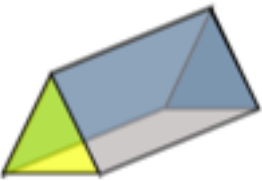

Dan has drawn a line of symmetry and half a shape. Can you fill in the rest of the shape?

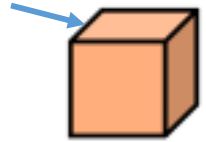

3D SHAPES

Can you fill in the table? I have done the first row for you.

Shape	Name of shape	Number of faces	Can you draw one of the faces?
	<i>Cuboid</i>	6	
			
			
			

An edge of a shape is where 2 faces meet. Like this →

How many edges does this shape have?

Have a look around your house and write down some objects you can see!

2 or fewer
faces

3 or more
faces

CHALLENGES:

All 3-D shapes
have at least one
vertex.

Is Sam right or wrong? Can you
explain your answer.

Anna has sorted these shapes. Which item is the wrong circle?

Explain how you know.
