

Write the number sentence and then solve it using cross outs.

12 toucans arranged in two rows of six.

$$12 - 6 = \bigcirc$$

18 monarch butterflies arranged in three rows of six.

$$18 - 14 = \bigcirc$$

12 monarch butterflies arranged in two rows of six.

$$12 - 5 = \bigcirc$$

10 parrots arranged in two rows of five.

$$10 - 3 = \bigcirc$$
