

Year 2

Science - home learning

For this task you will need to collect a few items when you are doing your daily exercise or from a garden. You will need to pick up 5 pieces of nature - e.g - leaves, twigs, flower.

For today's task you are going to look at the items you have collected and group them into categories - remembering back to our science topic from last term!. Are they similar colours? Do they have point edges? Could they change shape (bend/twist/squish/stretch)

Check this out...

TASK: Can you make a flow chart like this by asking questions?
